

Summary

There are four reporting tools available through the Business Data section. These reports give business data on employers, employment and wages by industry and by occupation, and individual businesses. All data can be selected on a county, region, or statewide level, and can be downloaded into various report formats. Information can be acquired through the Business Data button on the ACCESSNC website. Visit www.nccommerce.com and click on the ACCESSNC logo.

Report Choice by Tab Selection: (North Carolina only unless noted)

Business Search	NC Quick Search results are statewide, Advanced Search is available by state, regions, counties, cities or zip codes. Search results provide company name, street, city, county, business description, company size and annual sales. Clicking on the company name will produce a location map, and detailed company report. Search results can be downloaded 50 companies at a time.
Top Employers	Available at the county level only, employers are ranked based on reported employment by quarter. Report shows top 25 employers only.
Industry Employment	Using the North American Industry Classification System (NAICS), data are available down to the six-digit level in all currently reported industries. Report format options are HTML, PDF and CSV. Data are available for all 50 states and counties. Data include employment, quarterly wages and average weekly wage.
Occupational Employment	Data includes estimated employment, entry wage, median wages, average wages and experienced wages; hourly or annual rates can be displayed. Data can be shown by occupational category or by individual occupations at the detailed level. Sort results by geography, occupation, hourly wage rate or annual wage rate. Available for state; region, including COG, MSA, prosperity zone or workforce development area or custom region.
Commuting Profiles	Commuting Profiles available at the county level only show inflow and outflow of labor force by earnings group, age, resident county, state and workplace county. Each county includes two maps: one of inflow commuters and one of outflow commuters.
